Summary:

For the committee to consider the cost estimate from Perth Patios & Home Improvements for the proposed verandah.

Background:

The Wandering Community Centre is the community hub for the Wandering community and has been identified as a building that needs to be upgraded to ensure that community expectations of a modern facility are addressed and the building is fit for purpose going into the future.

A working group of various Community Members has been working with Council Representatives and an Architect to develop a design that meets the above objectives and it is now time to progress this further to the next stage.

Comment:

The committee met recently with a representative from Perth Patios & Home Improvements to discuss this project and he has now supplied Council with a quotation for the works. This quote is based on the latest design from Kim Harris. Perth Patio and Home Improvements have had their own engineer look at the design and has recommended some modifications to the design to maintain the structural integrity of the existing building and the new verandah.

As the cost estimate for the patio is less than \$250,000, it is not necessary to go out to public tender, three quotations will be needed in accordance with the Shire's Purchasing policy.

Previous Reference:	Item 12.1 Ordinary Council Meeting 15 June 2023

Summary:

To continue with the process of reviewing all Council policies to ensure they are still relevant and correct for the day to day workings of the Shire.

Background:

At the Ordinary Council Meeting held on 18 August 2022 Council resolved to adopt Policy 83 – Policy Manual which states that:

All policies within the Policy Manual are to be reviewed by Council every three years, being one third of Council's policies each year in a three year period. Council may review an individual policy at any time before the next review date if it determines it to be necessary.

As there are currently 90 policies of the Shire it is proposed that each month two to three policies are reviewed by Council, this will ensure that all policies are reviewed in the stated three year period.

Comment:

Three policies are to be reviewed this month:

Policy 15 – Integrated Planning

Policy 18 – Audit Committee – Functions and Membership

Policy 20 – Contiguous Land Valuations - Rates

These policies were presented to the General Planning Forum on 6 July 2023. Changes were made to only one policy – Policy 18 – Audit Committee – Functions and Membership. The recommended changes have been highlighted in the attachment (Item 1, Audit Committee's duties, remove (e)). Policy 15 – Integrated Planning will be reviewed again by Council once the new regulations from the Local Government Reforms have been announced.

Summary:

For Council to consider allocating Local Roads & Community Infrastructure (LRCI) Program Phase 4 funding to projects.

Background:

The Federal Government has committed a total of \$3.65 billion to the LRCI program and have new released the funding guidelines to this program. The Shire of Wandering will receive a total of \$288,069 under this program.

Comment:

The funding has been separated into two components;

Local Roads Projects \$105,379

Eligible Local Road Projects are projects that involve the construction or maintenance of roads managed by local governments. Local governments are encouraged to consider works that support improved road safety outcomes.

Community Infrastructure Projects \$182,690

Eligible Community Infrastructure Projects are projects that involve the construction, maintenance and/or improvements to council-owned assets (including natural assets) that are generally accessible to the public.

'Generally accessible to the public' means that the project, or the amenity provided by the project, is generally accessible to the public at large. Some areas are clearly publicly accessible as they are areas that are open to all members of the public such as parks, playgrounds, footpaths and roads.

Projects will also be considered generally publicly accessible if they are in a location that is:

- generally publicly accessible to the wider public undertaking a specific activity (for example council operated sporting fields); or
- generally publicly accessible for a limited age group of the community as a whole i.e. a kindergarten building; or
- used for the provision of an essential service or community service, as determined by the Department, and the amenity of the asset is publicly accessible and benefits the community.

During the 2023/24 Budget preparation process the Local Roads component of the funding has been allocated to the York Williams Road for bitumen sealing the last five kilometres of the southern portion of the road which means from Pumphreys Bridge to the Williams Shire will be complete and this work is programmed to occur in the 2023/24 year.

The Community Infrastructure projects portion of the funding is as yet not allocated to any project. This funding can be used for existing projects that are staged, allowing the possibility of using this funding for the Wandering Community Centre Upgrade. This funding can be added to the existing LRCIP phase 3 funding for the Community Centre upgrade. It is therefore recommended that this funding be allocated to the Community Centre Upgrade to complete further works as per the approved plans.

The construction period for the funded projects must be between 1st July 2023 and 30th June 2025.

Previous Reference:	General Planning Forum 1 June 2023

Summary:

The purpose of this report is to provide sufficient information summarising the results of the quotes called for one new Wheeled Excavator in this financial year and to enable Council to award the contract for this service.

Background:

As the Shire's proposed plant replacement program for the 2023/2024 financial year exceeds \$100,000.00 it was necessary to call individual pricing for the service.

This process was done with requesting quotes from local suppliers.

Comment:

Currently we have hundreds of culverts that require attention throughout the Shire and many hundreds of kilometres of drainage that needs to be cleaned out and re-established.

The Shire currently does not have a machine (fit for purpose) capable of undertaking this type of general maintenance work as it is traditionally done by a backhoe.

To maintain the level of service outlined in the newly adopted policy (Road Hierarchy/Maintenance Standards) we require a machine fit for purpose to undertake general drainage maintenance.

The machine being proposed as discussed at the general planning forum in June is a wheeled excavator, capable of travelling to the worksite on the road, avoiding costly mobilisations to and from the job site. The machine can be licenced to travel on the road meaning that it can be driven to the job site and does not have to be floated.

This item of plant will be a crucial addition to the upcoming works program for 2023/24, particularly with the Western Secondary Freight Network works on North Wandering and Regional Road Group works on York Williams. There are a significant number of culverts that need to be replaced and it will be necessary to have a machine of this type to get these works completed as the machine can easily be moved from one location to another without mobilisation.

Because of the size of the wheeled excavator, it will make all those general drainage maintenance jobs, quicker, easier, more efficient.

Staff recently attended a machine demo of a wheeled excavator and were very impressed with the versatility of these machines.

KEY INFORMATION

Prepaid rates are, until the taxable event for the rates has occurred, refundable at the request of the ratepayer. Rates received in advance give rise to a financial liability. On 1 July 2021 the prepaid rates were recognised as a financial asset and a related amount was recognised as a financial liability and no income was recognised. When the taxable event occurs the financial liability is extinguished and income recognised for the prepaid rates that have not been refunded.

SIGNIFICANT ACCOUNTING POLICIES

Each class of fixed assets within either plant and equipment or infrastructure, is carried at cost or fair value as indicated less, where applicable, any accumulated depreciation and impairment losses.

Assets for which the fair value as at the date of acquisition is under \$5,000 are not recognised as an asset in accordance with *Financial Management Regulation 17A (5)*. These assets are expensed immediately.

Where multiple individual low value assets are purchased together as part of a larger asset or collectively forming a larger asset exceeding the threshold, the individual assets are recognised as one asset and capitalised.

Initial recognition and measurement for assets held at cost

Plant and equipment including furniture and equipment is recognised at cost on acquisition in accordance with *Financial Management Regulation 17A*. Where acquired at no cost the asset is initially recognise at fair value. Assets held at cost are depreciated and assessed for impairment annually.

Initial recognition and measurement between mandatory revaluation dates for assets held at fair value

In relation to this initial measurement, cost is determined as the fair value of the assets given as consideration plus costs incidental to the acquisition. For assets acquired at zero cost or otherwise significantly less than fair value, cost is determined as fair value at the date of acquisition. The cost of non-current assets constructed by the Shire includes the cost of all materials used in construction, direct labour on the project and an appropriate proportion of variable and fixed overheads.

KEY INFORMATION

Borrowing costs are recognised as an expense when incurred except where they are directly attributable to the acquisition, construction or production of a qualifying asset. Where this is the case, they are capitalised as part of the cost of the particular asset until such time as the asset is substantially ready for its intended use or sale.

Fair values of borrowings are not materially different to their carrying amounts, since the interest payable on those borrowings is either close to current market rates or the borrowings are of a short term nature. Non-current borrowings fair values are based on discounted cash flows using a current borrowing rate.
